EXPERIENCE

● **full stack web develober**

popcards-sy.com | 2019

The first project that I fully implemented for the client, I used it React + axios + redux / node + express + jwt + bcrypt + multer.

- A site to sell cards, like Google Cards
- It has a system of messages and notifications
- It has a comprehensive and complex admin control panel that allows complete control
- Website link: popcards-sy.com

● **full stack web develober**

khabarwamakal.com | 2020

Diverse content blog built entirely using Next js + other packages like next-connect + axios + multer

- There is a control panel for admin and another for writers.
- Publishing, editing and deleting articles, as well as for notes.
- Text editor with automatic keyword checking.
- Website link: khabarwamakal.com

EDUCATION

- **Bachelor's degree in Human Medicine**
  tishreen university | 2018 - now

VOLUNTEER

- **Life chair**
  Syrian Informatics Association | 2020 - 2021

  - A chair for quadriplegic patients, we were working under the auspices of the Syrian Informatics Association

GIT / Gitlab

HTML5 / CSS3 / JS

Problem solving

MongoDB / mongoose

OBJECTIVES

- **Typescript**
- **Cloud computing**
- **React native**

EXPERIENCE

- **full stack web develober**
  landlines.com.sa | 2021

  An introductory site for the Land Lines Company for Logistics Services with a control panel for the manager and workers, Fully built with Next js

  - Drivers control panel with the ability to submit reports and access private company information.
  - Reports are generated dynamically, combining driver information with the information entered.
  - Text editor with automatic keyword checking.
  - Website link: landlines.com.sa

Sincerely
Omar KM
